Team Roles & Responsibilities

Team Codenections is a three-person team. While each person contributes to every part of the development process, everybody does have main roles. For their main roles, they will be the lead on the tasks of their parts of the development process and guide the team on how to complete those tasks. The team roles will be as follows:

Brendan Willenborg – Head of Documentation and Head of Front End. Brendan will lead the team on the documentation of the development process to make sure that all the submitted documentation meets our standards of documentation. He will also lead the team on the front-end development of the project to ensure that the user experience is user-friendly and easily accessible.

Miguel Lopez – Head of Quality Assurance and Head Software Engineer. Miguel will lead the team on Quality Assurance work and testing to make sure the project is thorough and complete in the testing phase of the project by setting our standards and practices of testing. He will also be the Head Software Engineer, which will have him decide the proper flow of the code and the how of the development process.

Travis Scott – Head Back End and Head Team Lead. Travis will lead the team in the thorough development process of the code of the project by ensuring that the code of the project is uniform and complete throughout. He will also lead the team throughout the whole project to ensure every component is on pace to complete the project.
